ARTICLES

S.S. Tomlinson and Y.P. Vaid Seepage forces and confining pressure effects on piping erosion 1

Junhwan Lee and Rodrigo Salgado Analysis of calibration chamber plate load tests 14

Jun Yang, Tadanobu Sato, and Xiang-Song Li Nonlinear site effects on strong ground motion at a reclaimed island 26

Michel Massiéra et Jean-Pierre Tournier Stabilisation de la berge rive nord de l'aménagement hydroélectrique La Grande 1 40

M. Hesham El Naggar and Jin Qi Wei Uplift behaviour of tapered piles established from model tests 56

Vinod K. Garga and Vince O'Shaughnessy Tire-reinforced earthfill. Part 1: Construction of a test fill, performance, and retaining wall design 75

Vince O'Shaughnessy and Vinod K. Garga Tire-reinforced earthfill. Part 2: Pull-out behaviour and reinforced slope design 97

Vince O'Shaughnessy and Vinod K. Garga Tire-reinforced earthfill. Part 3: Environmental assessment 117

B. Indraratna and I.W. Redana Numerical modeling of vertical drains with smear and well resistance installed in soft clay 132

H. Chen and C.F. Lee Numerical simulation of debris flows 146

D.M. McClung Extreme avalanche runout in space and time 161

Nirmala Gnanapragasam Active earth pressure in cohesive soils with an inclined ground surface 171

Lidija Zdravković and Richard J. Jardine Undrained anisotropy of K_0-consolidated silt 178

Alexandre Cabral, Isabelle Racine, Fabien Burnotte, and Guy Lefebvre Diffusion of oxygen through a pulp and paper residue barrier 201

Vincent Silvestri Performance of shallow foundations on clay deposits in Montréal Island 218

K.M. Lee and V.R. Manjunath Soil–geotextile interface friction by direct shear tests 238

NOTES

Hongsheng Li, Haitian Yang, and Zengli Liu Experimental investigation of fracture toughness K_{IIC} of frozen soil 253

Samuel T. Ariaratnam, Erez N. Allouche, and Kevin W. Biggar Testing of a new generation horizontal soil sampler 259

C. Cherubini Reliability evaluation of shallow foundation bearing capacity on c', ϕ' soils 264

DISCUSSIONS

J.A. Howie and Y.P. Vaid Evaluating cyclic liquefaction potential using the cone penetration test: Discussion 270

P.K. Robertson and C.E. (Fear) Wride Evaluating cyclic liquefaction potential using the cone penetration test: Reply 272

S.J. Boone and A.J. Lutenegger Physical, chemical, and mineralogical properties of Mexico City sediments: a geotechnical perspective: Discussion 274

J.A. Díaz-Rodríguez, R. Lozano-Santa Cruz, V.M. Dávila-Alcocer, E. Vallejo, and P. Girón Physical, chemical, and mineralogical properties of Mexico City sediments: a geotechnical perspective: Reply 276

BOOK REVIEWS / CRITIQUES DE LIVRES

Charles F. Ripley Karl Terzaghi — The engineer as artist 277

Arvid Landva Problematic soils: Volume 1 279

D.M. Cruden Landslides: Proceedings of the 9th International Conference and Field Trip on Landslides, Bristol, United Kingdom, 5–16 September 1999 280

Instructions to Authors I-1

Recommendations aux auteurs R-1

April / avril

ARTICLES

R.W.I. Brachman, I.D. Moore, and R.K. Rowe The design of a laboratory facility for evaluating the structural response of small-diameter buried pipes 281

Loretta Y. Li and Raymond S. Li The role of clay minerals and the effect of H^+ ions on removal of heavy metal (Pb^{2+}) from contaminated soils 296

C. Saix, P. Devillers et M.S. El Youssoufi Éléments de couplage thermomécanique dans la consolidation de sols non saturés 308

Gerald P. Raymond Track and support rehabilitation for a mine company railroad 318

Fernando Rodríguez-Roa Observed and calculated load–settlement relationship in a sandy gravel 333

Pierre Delage, Nabil Sultan, and Yu Jun Cui On the thermal consolidation of Boom clay 343

R. Kerry Rowe, Mark D. Armstrong, and D. Roy Cullimore Mass loading and the rate of clogging due to municipal solid waste leachate 355

Peter J. Bennett, Frederick J. Longstaffe, and R. Kerry Rowe The stability of dolomite in landfill leachate-collection systems 371

Jiin-Song Tsai, Lee-Der Jou, and Hsii-Sheng Hsieh A full-scale stability experiment on a diaphragm wall trench 379

Dayakar Penumadu and John Dean Compressibility effect in evaluating the pore-size distribution of kaolin clay using mercury intrusion porosimetry 393

P.V. Sivapullaiah, A. Sridharan, and V.K. Stalin Hydraulic conductivity of bentonite–sand mixtures 406

Asim Haldar, V.S.N. Prasad Yenumula, and T.R. Chari Full-scale field tests on directly embedded steel pole foundations 414

Chang-Yu Ou, Bor-Yuan Shiau, and I-Wen Wang Three-dimensional deformation behavior of the Taipei National Enterprise Center (TNEC) excavation case history 438

Charles Harris and Antoni G. Lewkowicz An analysis of the stability of thawing slopes, Ellesmere Island, Nunavut, Canada 449

NOTES

A.-H. Soubra Static and seismic passive earth pressure coefficients on rigid retaining structures 463

Tom A. Al and David W. Blowes Identification of preferential flow effects on hydraulic conductivity measurements using a fluorescent tracer 479

Da-Yong Zhu and Qihu Qian Determination of passive earth pressure coefficients by the method of triangular slices 485

DISCUSSIONS

Bachir N. Touileb A numerical solution of cavity expansion problem in sand based directly on experimental stress–strain curves: Discussion 492

Branko Ladanyi and Adolfo Foriero A numerical solution of cavity expansion problem in sand based directly on experimental stress–strain curves: Reply 494

ERRATUM

Robert K. Niven and Nasser Khalili Erratum: In situ multiphase fluidization ("upflow washing") for the remediation of hydrocarbon contaminated sands 497

June / juin
